

Without XM radio, I would have been caught in a snow storm so severe that it shut down major freeways. I am a traveling sales rep that travels 6 states and in the past without XM broadcasts, I've been unable to hear the news, weather, and absolutely no coverage in many areas I travel in, which enabled me to drive "blind" to what was happening around me. It is unconstitutional of my rights to pay for something and then be denied my rights. It is not up to the Natl Assoc. of Broadcasters to tell me what I can and cannot hear. I beg of you to reject the NAB's petition 04-160 and support the ability I have with freedom in the US to get the programs that we deserve.

Thank you,

Cheryl Calcagno
